Hello all!

I felt it was necessary to do a reintroduction with the new beginnings. I have been a stylist for 23 years in the conventional beauty industry and a business owner for 16 years. I have always had an interest in health and wellbeing, but over the last five years, I have delved deeper into what that means, thanks to the signals my body was giving me. I made it a priority during this time to learn about all the ways we can support our bodies and their ability to heal. In this process, I not only conducted personal research, but I also took a holistic training course in functional nutrition and, most recently, in holistic hairdressing (@goldenagestylist). I have loved learning all the ways we can support our bodies and our ability to heal, but especially about how the things we put on our bodies impact us, as our skin is our largest organ. What we put in and on our bodies has such a huge impact on not just how we physically feel, but emotionally too. Skin, as well as hair health, is a reflection of the wellness of our bodies. Health is truly mind, body, and spirit. In all of this navigation with the mission to learn, teach, and provide a healing space, I have found that merging beauty and wellness was what I needed to support my overall health and well-being. I am so grateful to be able to offer this to those who are sensitive like myself, or simply want to learn and have a safe space to do so. I am so excited for what is to come, and I can't wait to see you in my chair!

Warmly, Summer
